

S9 Fig. Top: Microscope images (A = brightfield, B = Fluorescein, C = merge) of healthy HEK293T cells incubated with substrate **27** (10 μ M). Bottom: HEK293T cells incubated with staurosporine (1 μ M) and substrate **27** (10 μ M)(D = brightfield, E = Fluorescein, F = merge) with only apoptotic cells exhibiting fluorescence.
